

A message to All Found Lake Property Owners - March 1, 2021
This is also posted on our Facebook page

There are two important items for Found Lake Property owners to be aware of and to act upon:

First, as many of you know, the Found Lake POA has been working with the Town of St Germain and the DNR for the last 2 years to install an ILIDS camera at the boat landing. After many hurdles, last Friday we were approved for a DNR grant for part of the cost for the installation. Additional funding from the Town of St Germain was approved last year. Our association will be paying a very small portion of the installation cost. One final hurdle will be finalizing a Property Use agreement with the DNR. Because of this last step, some of you will be receiving an email with a Public Comment Survey from the DNR about our project to install an ILIDS camera at the boat landing. The survey will have a blue link to the ILIDS site explaining the camera with photos as well.

IMPORTANT - On the survey we encourage you to please answer NO - the camera will have no affect on your experience at the boat landing . By answering using the no button, you are agreeing to the placement of the camera and it will have no affect on you. You can still make a comment in the box in Number 2- either way.

The Second item is to let you know that the Town of St Germain is planning on installing ChoiceTel fiber optic high speed internet to every dwelling in the town over the next 2-3 years. This is really a good deal for many of the seasonal people for there will be the ability to turn on and off the service seasonally without a additional charge. The fees are very reasonable and the installation is free except you need to buy your own router and there will be an extra small charge for driveways longer than 400 feet. All of the details are outlined on the Town website --the link is [Fiber Optic Project \(townofstgermain.org\)](http://www.townofstgermain.org) be sure to read the Q&A section.

IMPORTANT - I would encourage you to get signed up as soon as possible using the Choice Tel link on the Project web page. The fiber optic cable running to St Germain is already installed on Four Corner Lane.

Thank you,
Bob Schell, Chairman Found Lake POA
